

enhanced Final Approach Runway Occupancy Signal (eFAROS) at BOS 15R/33L, 4R/22L, 4L/22R, 27 and 32

eFAROS = enhanced Final Approach Runway Occupancy Signal
 BOS = Boston Logan International Airport

eFAROS.org

Not to scale. Not for navigational use.

eFAROS Operational Concept

Prepare for a go-around if you see flashing PAPIs for **your** landing runway.
Flashing PAPIs indicate runway is now, or soon to be, occupied by one or more targets.
Remember: non-flashing PAPIs do **not** constitute a clearance to land.

Acquisition Point
Look for traffic on runway

Contact Point
Contact ATC if traffic is not acquired

Flashing PAPIs indicate
the runway is occupied!
